Profile

Soon to be a computer science graduate, I am in pursuit of a position at an established company where I can put my coding skills to use and continue expanding my technical knowledge. I am eager to find creative solutions to difficult problems, learn new languages and am keen to work in back-end development.

In my degree I have gained experience in a diverse range of areas such as software development, algorithms and data structures, security and encryption, databases, and deep learning models. On top of this, I have assimilated a diverse set of soft skills from previous jobs in other industries and through my volunteer work.

Education

BSc (Hons) Computer Science,
Goldsmiths, University of London [🔗](#)
Oct 2019 – Jun 2022
Year 1 average: 82% | Year 2 average: 90%

Work Experience

Delivery driver, Tesco PLC [🔗](#)
2018 – present | United Kingdom

Warehouse operative, WW Meats / Transmec Group
2016 – 2018 | United Kingdom

Office administrator, Casais SA [🔗](#)
2010 – 2016 | Portugal

Volunteer, Member of the Board, Coordinator,
Eleva-te Associação Cívico-Cultural [🔗](#)
Aug 2010 – Oct 2015 | Portugal
Along with 9 friends, I have created this ONG with the purpose to provide our community with free workshops performed by professionals in different areas and interests. Throughout 5 years we have made possible more than 50 activities for 100+ participants in partnership with local authorities, schools and other ONG's, all done with a diverse team of 20 volunteers with ages between 16 and 65.

Skills

Languages & Techs (Python, Java, JavaScript, Databases (SQL, MongoDB), Node.js, Express.js, TensorFlow, Jupyter, MATLAB, HTML, CSS3)

Technical Skills (Algorithms, Data Structures, Database Design, Deep Learning, Machine Learning, Artificial Neural Networks, GitHub version control, Agile Methodologies, Android Development, Web Development)

Soft Skills (Problem Solving, Teamwork, Communication, Creative Critical Thinking, Project Management, Strategic Planning, Research, Flexibility, Time management)

Languages

English ● ● ● ● ●

Portuguese ● ● ● ● ●

Relevant Projects

Real-time Convolutional Neural Networks for Emotion Classification,
TensorFlow / Jupyter Notebook [🔗](#)
Oct 2021 – May 2022

Deep Learning for Regression Problems,
TensorFlow / Jupyter Notebook / HTML [🔗](#)
Nov 2021 – Dec 2021

Splitsy: Bill Splitting App | Android,
Java / MySQL / GitHub / Agile / Scrum [🔗](#)
Oct 2020 – Apr 2021

Calorie Buddy | Dynamic Web Application,
JavaScript / Node.js / Express.js / MySQL / HTML [🔗](#)
Feb 2021 – Apr 2021

More projects at my GitHub repository [🔗](#)
